

Marine Straddlelift and Marine Forklift Operator Training at IBEX 2010

*October 1, 2010
Kentucky Exposition Center
Louisville, Kentucky*

Two Great Trainings—One Low Price

Stay an extra day in Louisville following the International Boatbuilders' Exhibition & Conference (IBEX) to attend two ABBRA Marine Equipment Operator Trainings (MEOT); Marine Straddlelift & Marine Forklift, both taught by renowned instructor Paul Doppke.

Safe and effective equipment operation is essential for boat builders, repairers, service operators, dealerships, and marinas that rely on this equipment for their moving operations. This unmatched, two-part session will help ensure OSHA* keeps away from your door while you improve operations at the same time.

The topics that will be addressed in this classroom training include: OSHA requirements; Operator Responsibilities; Accident Prevention; Equipment Inspection; Boatlifting & Blocking Standards; Job Site Safety; Lift Planning; Supervisor Awareness; Rigging Considerations.

Straddlelift Training \$150
Marine Forklift Training \$150 OR **Both Trainings Combined**
Only \$275!

Full payment is due with registration.

*This course satisfies the classroom portion of the OSHA certification for forklift or straddlelift operators. To complete the OSHA certification, students must also complete and pass a driving test on their own facility's equipment. Visit www.osha.gov for more information on the driving test and certification. This course is NOT hands on; it is only the classroom portion of the training.
