TACO MARINE EXHIBITING AT IBEX BOOTH #2343

Products exhibited will be Rub Rail, Seating and Pedestals, LED Lighting, Sport Fishing Accessories

Louisville, KY September 15-17, 2015 – Taco Marine, developing innovative products for the marine industry for over five decades will participate as an exhibitor at IBEX taking place at the Kentucky Exposition Center, Louisville, KY in booth #2343.

Within the past year Taco Marine has introduced a new line of LED lights that include low-draw, hard-wired waterproof (non-submersion) Flood, Spreader, Spot and T-top lights along with Deck lights for Flat Mount and Pipe Mount. All lights are designed for 12-24V applications and come with an 8-foot power cable and USCG, ISO and SAE certified for Ignition Protection. This year at IBEX 2015, Taco Marine will be introducing an industry-first: telescopic and internal multiple line carbon fiber outrigger poles that will extend 16' yet be lighter and stiffer than any aluminum pole. With this pole the bait being trolled will have a more natural action through the water and will eliminate whipping motion in rough seas. Taco Marine will also introduce a low-profile Shock Mitigation Seat Pedestal. This new design absorbs shock and vibration to minimize fatigue on boater's neck, shoulder, back and legs but does so in a low profile version that is needed in many popular types of boats. The popular Neptune II Leaning Post has been redesigned with a new removable bag that offers excellent storage for all your gear. It is made of highly durable 1000 Denier fabric and ballistic nylon bottom which make it waterproof from underneath along with Marine Grade YKK zippers. Due to its sleek, well-constructed design and shoulder carrying strap, the bag is easy to remove from the leaning post allowing the bag to travel to and from the boat. Be sure to stop by our booth #2343 to view the full assortment of quality products that Taco Marine has to offer.

"Our aim is to provide application solutions for our customers along with the highest quality standards and with excellent service", noted Mike Kushner, Vice President of Sales.
