

CARBON FIBER TUNA TUBES

INTRODUCING GEMPLUX CARBON FIBER TUNA TUBES

Keep Your Live Bait Alive, Healthy, and Ready to Hunt

Serious anglers know—live bait can make or break the catch of a lifetime. GEMPLUX Carbon Fiber Tuna Tubes are the ultimate solution for keeping your baitfish calm, healthy, and ready for action. Built with premium materials and precision engineering, these tubes are designed to perform in the harshest marine environments.

WHY CHOOSE GEMLUX TUNA TUBES

Carbon Fiber Construction

Lightweight, ultra-strong, and corrosion-resistant for long-lasting performance.

Rule Pumps Preinstalled

500 GPH for 5" tubes and 800 GPH for 6" tubes—ready to go out of the box.

Smooth Interior Finish

No hardware protrusions—protects delicate baitfish from stress, scale loss, or injury.

Dark Interior

Calms bait to reduce stress and improve survival.

Custom Silicone Nose Cone

Gently secures bait without damage.

Custom Bracket System

Engineered for secure, customizable mounting on any vessel.

Endless Plumbing Flexibility

Compatible with 1 1/8" hose via hose barb or internal pump configuration.

CONFIGURATIONS TO FIT YOUR SETUP	
Tube Sizes	5" or 6" diameter
Bank Options	2, 3, 4, 5, or 6-bank with custom mounting brackets
Maximize Capacity	Configure based on your vessel's layout and bait needs
Mounting Options	Livewell Mount: Fast installation with SeaSucker mounts—install or remove in seconds Transom Mount: Heavy-duty V-Lock system allows secure mounting without losing livewell access
Professional Installation Recommended	Wiring: Pumps include factory leads. A certified marine electrician can ensure ideal connections and layout. Plumbing: For transom use, we strongly recommend a certified marine plumbing technician and a sea chest with manifold for optimal water flow control.

Experience the next level of live bait performance with GEMLUX Carbon Fiber Tuna Tubes.
BUILT FOR SERIOUS ANGLERS. READY FOR SERIOUS RESULTS.
