

## **ACEL Power Electrifies Sea Pro Boats with world's first 75 HP Electric Outboard Propulsion System**

Company Shares Future of Electric with Its Intelligent Marine Power System

VANCOUVER, September 28, 2023

[ACEL Power Inc](#) is proud to partner with Sea Pro Boats to launch its 75 HP Electric Outboard Propulsion System in the USA. ACEL Power, an industry front-runner in marine technology, is set to revolutionize the marine industry with the world's first mass-produced 50 and 75 HP electric outboard motors. This ground-breaking launch establishes ACEL Power as the first company globally to bring such powerful, eco-friendly solutions to the market. ACEL Power's innovative solution arrives amidst growing environmental concerns, making it more relevant than ever.

Engineered to optimize efficiency, ACEL Power's electric outboard motors guarantee robust power output, reliable performance, and impressively quiet operation.

"For ACEL, electrification goes beyond changing from gas to electric outboard motors. It's about digitalizing the entire experience. Our comprehensive Intelligent Electric Propulsion

system represents a significant leap forward in terms of hardware & software integration, intelligence, safety, and sustainability," says CEO and Co-founder Anthony Liu.

"Choosing electric doesn't mean compromising on performance. From the moment boaters hit the throttle, they feel the excitement of electric power, which boasts 30% more torque, allowing for nearly instant acceleration and faster planing speeds," says Liu. "It was crucial for us to deliver a powerful experience to encourage more boaters to make the eco-conscious choice. Partnering with Sea Pro will help us bring our solutions to the market," he adds.

### [ACEL VIDEO](#)

ACEL Power's systems outshine gas-powered alternatives by offering zero emissions, eliminating fumes and noise while delivering power, range, and performance. The electric propulsion system is easy to install and maintain and comes with customizable battery options. What sets ACEL apart is their years of manufacturing experience, patented technology, and robust supply chain.

ACEL Power is unwavering in its commitment to transforming marine propulsion. Ready for orders, ACEL is inviting boat builders to visit their booth 1-313 at Ibex.

**About ACEL Power:** ACEL Power is a pioneering manufacturer of electric outboard propulsion systems for the marine industry. Based in Vancouver, Canada, ACEL Power is at the forefront of innovation and sustainability, delivering the world's first mass-produced 50 and 75 HP electric motors. ACEL Power's commitment to shaping a sustainable future for the marine industry is realized through its state-of-the-art products, future vision of offering models from 1HP to 650HP, setting new standards for performance, maintenance, and longevity in marine propulsion. Leveraging patented technology and integrated software solutions, ACEL Power aims to drive change towards a cleaner, more efficient boating experience.
