BOAT FIX REVOLUTIONIZES WITH 24/7 CUSTOMER/MECHANICAL HOTLINE

Dateline: Southport, CT [August 27, 2021] – Forward-thinking, Boat Fix founder Alastair Crawford filled a much needed gap in the telematics industry with his unique Boat Fix device after experiencing 4-6 week wait times for service at his dealership.

His solution? Create a product that monitors the boat’s key systems, tracks location and speed, and simultaneously provides 24/7 mechanical and alarm support through a dedicated call center and a robust app.

The easy-to-install Boat Fix device is a game-changer in the OEM market and acts as dealership support when they are backed up, closed, or just can’t get to customer questions.

With a lifetime warranty, a pool of skilled customer service reps and mechanics ready and waiting, customer calls are answered immediately with a 90% fix rate.

At an affordable \$248/boat - Boat Fix is the most valuable add-on for any line in production with zero cost to dealerships.
