

PEXLock Plumbing Clamps

PEXLock is a hybrid polymer clamp approved for potable plumbing systems that installs with household pliers. PEXLock is removable with a screwdriver blade and reusable. A 25-year warranty when used with Flair-It EcoPoly insert fittings and valves. PEXLock works with PEX and Polyvinyl.

Flair-It White Compression Fitting

Flair-It White Compression fittings and valves are tried-and-true, never imitated originals. Flair-It fittings are still the only ID sealing compression fittings on the market that works with PEX, PERT, Polyvinyl and Polybutylene (gray pipe). Proven 30 years in the field. #1 recommended by dealers. No tool installs, simply tighten the nut.

Flair-It PRO Manifold

Flair-It Manifolds come in 8 to 36 port configurations. The PRO manifold is the only true 1" flow chamber, maximizing water output and pressure. Its modular design allows for quick-n-easy hook-ups with Flair-It EcoPoly swivel valves. The all plastic system uses no "O" rings, nothing to fail over time. Retail packaged.

PEXLock Displays

PEXLock's POP display fits in a small footprint, but returns big dividends. Each PEXLock color coded bag includes the fitting/valve (3/8", 1/2", 3/4" and 1") along with the PEXLock clamps, benefitting the consumer, eliminating repair guesswork. Re-sealable Bag includes instructions in Spanish, English and French, along with Bar-Code.

About Flair-It

Flair-It has been selling engineered fittings and valves in North America for over 30 years. Flair-It specializes in all plastic systems, reliable in harsh environments and standing the test of time, with no leaks. Flair-It prides itself on high quality products, backed with a 25-year warranty. The Flair-It fittings and valves, along with the original PEX A pipe, FLEXPEX, is all backed in distributor warehouses throughout North America. We make plumbing simple; it doesn't have to be Rocket Science.
