**Finally, An Easy To Use and Hard To Lose Drain Plug**

***inteliPlug; guard against sinking***

Houston Texas, September 10, 2020

Manufacturers are designing boats that look great and do it all. These boats feature an endless list of accessories that make time on the water more enjoyable. With this in mind, the Engineering Team at inteliPlug created the ALL NEW Vault series drain plug. This easy to use and hard to lose premium threaded drain plug replaces any 1/2 “ NPT plug on the market.

Our Vault Series is a revolutionary new boat drain plug designed to replace conventional transom drain plugs on existing boats and on new OEM built boats. It features an ergonomic grip that allows the user to thread in and thread out Vault without having to use cumbersome tools. It also has an added backup o-ring for a secure watertight fit. Did we mention it floats? That’s right, in the event it is accidentally dropped into the water, the Vault series drain plug floats so it cannot be lost at the boat ramp. We want to help boaters adhere to the new clean, drain, dry invasive species laws.

Eddie Valverde, Founder & CEO, stated; “we obsess over drain plugs so you don’t have to” and “our easy to use & hard to lose drain plugs keep you safe”.
