

FOR IMMEDIATE RELEASE

Fasnap Corp. and SUREFAS Announce Agreement in Principle for U.S. Market Partnership

Partnership will bring the Q-SNAP, PERFIX, CAF-316 and CAF-COMPO product lines to customers throughout the United States

ELKHART, Ind. — October 7, 2026 — Fasnap Corp., a leading supplier of fasteners, attaching equipment and related products, announced today that it has reached an agreement in principle with SUREFAS to introduce and distribute the Q-SNAP, PERFIX, CAF-316 and CAF-COMPO product lines in the United States.

The proposed partnership combines SUREFAS' innovative product portfolio with Fasnap's established U.S. sales, distribution and technical-support capabilities. Through this relationship, Fasnap expects to expand access to these products and provide customers with dependable inventory, responsive service, and knowledgeable product support.

"We are excited about the opportunity to partner with SUREFAS and to expand these product lines in the U.S. market," said Ryan Grady of Fasnap Corp. "The Q-SNAP, PERFIX, CAF-316 and CAF-COMPO products complement our existing portfolio and support our commitment to providing customers with innovative, reliable fastening solutions."

The companies expect to formalize the partnership prior to the ATA Expo, taking place November 3–5, 2026, in Orlando, Florida. Fasnap plans to make the full Q-SNAP, PERFIX, CAF-316 and CAF-COMPO product lines available to customers beginning in January 2027.

"Fasnap's industry experience, customer relationships and nationwide distribution capabilities make the company an ideal partner for expanding these products in the United States," said Bas Jan Veldhoen, general manager of SUREFAS. "We look forward to working together and building a successful long-term relationship."

About the Products

- **Q-SNAP**
 - o Q-SNAP® is a secure press fastener with an integrated lever that makes it easier to fasten tightly fitted boat covers and other technical textiles. The system can be installed up to three times faster than other secure fasteners and is manufactured from seawater-resistant 316 stainless steel. Q-SNAP allows fabricators to produce tight-fitting covers while providing users with easy, dependable operation.
- **PERFIX**
 - o PERFIX® is a secure press-fastener system designed without protruding pins or components. Its smooth, rounded attachment points provide a secure connection that remains easy to release under a variety of conditions. Manufactured from high-quality, corrosion-resistant plastic, PERFIX is durable and available in several color options.
- **CAF-316**
 - o CAF-316® is a conventional press fastener manufactured from seawater-resistant 316 stainless steel for demanding marine applications. Its internal spring is also made from a specialized stainless-steel alloy, helping the fastener maintain consistent performance and durability over time—even under harsh conditions.
- **CAF-COMPO**
 - o CAF-COMPO® is a self-tapping composite screw stud designed for use in fiberglass, wood and other composite materials. Available in multiple colors, it can blend with the mounting surface while providing a corrosion-free fastening solution. A metric M6-threaded version is also available for installation in aluminum and other metals.

About Fasnap Corp.

Founded in 1981, Fasnap Corp. is a leading supplier of fasteners, attaching machinery and related products serving customers across a wide range of industries. The company's corporate office is in Elkhart, Indiana, with an

additional location in Orlando, Florida. Fasnap is committed to providing quality products, responsive service and knowledgeable technical support to customers throughout the United States.

About SUREFAS – Next Generation Fasteners

SUREFAS B.V. is the Dutch company behind products like PERFIX®, Q-SNAP®, CAF-316® and CAF-COMPO®. Since 2003, the SUREFAS team has been dedicated to improving fastening systems for industrial textiles. SUREFAS offers next-generation fasteners for technical textiles—designed for applications where textile fasteners truly make a difference by providing added value in quality, functionality and appearance.
