

Frigibar LLC Celebrates their 50th Anniversary

Raising the industry standards

Press Release

For Immediate Release

Fort Lauderdale Florida July 2021

Frigibar LLC announcing 50 years of manufacturing quality refrigeration products for the boating industry. Products including the Polar Cap Ice maker, Polar Cube and Polar Cub packaged condensing units as well as the well-known fiberglass refrigerator/freezer boxes.

Under new ownership since April 2018 and in a new manufacturing facility located in Fort Lauderdale Florida, Owner Seann Pavlik looks to the future to design and manufacture products he would want on his own boat. At Frigibar we take pride in our ability to provide customers with quality-built products as well as custom fabrications.

Over the past 50 years the Frigibar name has been synonymous with superior quality and design. We are the first and only manufacturer of the world's finest fiberglass refrigerators and freezers, making us the most trusted name in the marine industry. In recent years we have expanded our product line to include aluminum and stainless-steel evaporator plates, custom refrigerated fiberglass and stainless-steel liners, and drop-in packaged condensing units offered in a variety of sizes and voltages, among others. Our newest addition is the fully self-contained Polar Cap ice maker, which produces up to 540 pounds of ice per day with an innovative new design that makes the unit smaller and lighter.

All of our units are made in the USA using only first-rate craftsmanship and materials. Sleek and seamless designs create high-performance solutions that are both beautiful and functional, eliminating the concern of inadequate on-board cold storage. Trust us to make any journey possible!
