## **Mobile Environmental Solutions Excited to Exhibit Mobile Workstation at IBEX Show**

“We can’t wait to exhibit at the IBEX Show! We want to demonstrate to the marine professionals how our portable workstations can help streamline their workflow and increase profitability with minimal investment,” says Tom Williams, president of Mobile Environmental Solutions. “We’re grateful to the National Marine Manufacturers Association for organizing such a wonderful event and giving us this opportunity to showcase our American-made solutions for on-site painting.”

Handmade with durable materials, the workstation is easy and quick to set up. It takes just a few minutes to inflate, and once the job is done, it deflates just as quickly, folding up compactly within its own storage system for safe keeping until the next time you need it. Mobile Environmental Solutions’ portable workstations also feature 360 degrees of natural ambient lighting as well as the company’s exclusive AirFlow System, a cross-flow filtration system that removes contaminants and preserves the environment, ensuring compliance with EPA and OSHA guidelines as well as NFPA’s 701 rule. Mobile Environmental Solutions’ patented products ensure your satisfaction with a one-year limited manufacturer warranty.

While Texas-based Mobile Environmental Solutions will only be exhibiting its 12x15 portable workstation at the IBEX Show, the company’s mobile solutions for limited workspaces are available in multiple sizes to meet customers’ various needs.

*Mobile Environmental Solutions is the leading provider of mobile paint booths manufactured in the U.S. Our booths feature an exclusive AirFlow System and 360 degrees of natural ambient lighting. They are ideal for many applications - painting, window tinting, wraps, spray-on truck bedliners, and more - while adhering to all environmental and governmental regulations.
