

Teak Isle's New Bass Boat Accessories

Ocoee, FL - September 28, 2023 - As a leading provider of marine products and accessories, Teak Isle is thrilled to announce a wide range of new bass boat accessories. Teak Isle has previously focused on the offshore fishing market but has recently focused on the opportunities in the bass boat market.

"Teak Isle is now integrating their experience of working in the offshore industry to the bass boat market," says Donnie Ewers, one of Teak Isle's OEM Sales.

The new clear Livewell View Port allows bass fishermen to check on their catch without taking the time to open traditional livewell lids. A quick glance allows anglers to make sure the pumps are still running, and the fish are alive. The lid is made with an anti-fog, heat-blocking acrylic to prevent scratching and keep the water cool. This exciting advancement helps keep the fish alive, allows for more casts, more catches, and more tournament wins.

Many boats have basic dividers that often become a complete mess through a day of fishing. Teak Isle's new Tackle Organizer replaces the existing storage in the center area and provides better organization with more convenient access to your tackle. This helps fishermen spend less time looking through all their gear and more time casting.

Teak Isle's new Bubba Scale Holder allows fishermen to place their scale where it is out of the way while allowing quick and easy access to the scale when needed. This mount helps reduce time searching for your scale, helps get the fish weighed, and gets fishing lines back in the water as quickly as possible.

Teak Isle now offers customized bass boat rod tube organizers to provide safe storage of expensive rods below deck. The black PVC rod tubes are available in a variety of diameters to accommodate different types and sizes of rod eyes. Corresponding rod holders are available to support the rod butt and reel.

Built from King StarBoard and utilizing stainless steel hardware, Teak Isle's bass boat accessories are built to the highest quality standards and will increase the marketability of your boats.

Teak Isle Mfg. is the trusted source for CNC-cut OEM plastic and wood component parts for over 200 boat builders. With 20 engineers, over 350 team members, and running 13 CNC routers, Teak Isle works with builders from design concept to on-time delivery of high-quality custom parts. Products include cabin entry doors, laminated cabinetry, Corian countertops, access doors, bent acrylic sliding doors, and King StarBoard HDPE parts.
