

# THE EXPERIENCE

## **ENTERING THE U.S. MARKET**

We have already conquered the Scandinavian countries, and have strategic partnerships in the North.

We are ready for the U.S. markets!

1

### **The easiest-to-use smart plotter on the market**

The new generation of navigation is here with The Q Experience. Our mission is to make navigation and boating easier, and more accessible for everyone.

The Q Experience product family gives you everything from smart navigation plotters to mobile apps, including a NMEA digital switch, remotes for the displays, and an antitheft alarm directly to your phone.

The Q Display, the easiest-to-use smart navigation plotter on the market, gives you all the boating info on a clear and crisp touchscreen. The user-friendly interface makes navigating easy and simple.

2

## Branded and customized for your boat brand

The Q Experience navigates your boat brand to a whole new level with the all-in-one Q Display. The Q Display, together with The Q Mobile App, is customized for your boat brand, making it a seamless part of your boat - just like the dashboards in modern cars. It adapts both for fuel, and electric propulsion systems.

## Why stop there?

**Connected Vehicle** enables all The Q Experience connectivity features in any transportation medium; for example in jetskies, snowmobiles, or motorcycles.

Perfect for enthusiasts and rental fleets — of course with your branding.
