

Outstanding sales growth triggers Scanstrut move to significantly larger facility.

Westbrook, CT, USA (Sept 27th, 2022) – Due to phenomenal growth over the last two years, Scanstrut announces it has moved into a significantly larger facility in Westbrook, CT. The new location is its headquarters for its North American operations and serves all of its distribution, dealer and OEM customers.

Chris Beaudry, General Manager, VP commented “our move to a brand new, significantly larger facility will enable our North American operation to increase inventory levels and more efficiently service our customers, without whom this expansion would not be possible. I look forward to leading this next phase of growth with the company.”

Scanstrut’s award-winning range of outdoor technology products has been a key factor in its recent growth. Highly innovative products such as its wireless and USB chargers are now factory fit for an ever-growing number of iconic boat brands in North America together with a loyal and expanding network of aftermarket dealers and installers.

Tom Reed, Scanstrut CEO commented on the major expansion, “Under the fantastic leadership of Chris Beaudry, Scanstrut Inc. has grown significantly and I’m delighted that we’re able to expand our operations to meet the needs of our customers. With several major new product launches coming over the next two years, the additional space and shipping efficiencies it will provide will keep us running at full speed into our next phase of growth.”

Learn more about Scanstrut latest products at IBEX Show 2022, Booth 1-801, from September 27-29, 2022 at the Tampa Convention Center.

About Scanstrut

Scanstrut is an international leader in the design and manufacture of outdoor and marine equipment.

With a range of over 300 items, Scanstrut products enable and enhance the use of commercial, navigation, and personal electronics in the outdoors. These are grouped broadly into mounts, charge and seal ranges, and include waterproof wireless phone chargers, Satcom solutions for superyachts, and tablet mounts for RV.

Based in the UK and the USA, it is an independent and highly innovative company that is highly respected for the quality of its products. During its 37-year history, it has delivered several “world’s firsts”, won numerous design and product awards, and a Queen’s Award for International Trade.

Every innovation is originated and delivered from concept to production entirely by an in-house design and engineering team and is trusted by its global customers to deliver high-performance products for the toughest of marine, off-road and industrial environments.

Scanstrut products are used on powerboats, yachts, off-road vehicles, RVs & industrial spaces, from Australia to the Arctic, Vancouver to Dubai.
