## ***Introducing New Marine IoT Development Program***

### ***For Boat Builders and OEM's***

**Tampa, FL.** – September 26, 2022 – [Blue Guard Innovations \(BGI\)](#), a global provider of remote boat monitoring and control solutions, is introducing, a new IoT Development Program to partner up with Boat Builders and OEM's. The first of its kind partnership program offers accelerated entry into remote boat monitoring and control with rapid market introduction and minimal costs. Key features of the partnership program are:

1. App customization reflecting customer's branding and identity
2. Rapid development of the new monitoring and control functions
3. Revenue sharing on recurring revenue applications

**Marine IoT Development Program** is based on BGI's [Smart Skipper™ System](#) platform and considers all the aspects of the Security, Safety & Control needed for the today's mariner's vessels, passengers, and guests.

BGI will be presenting their **Marine IoT Development Program** and its benefits to Boat Builders and OEM's at [IBEX 2022](#) from September 27-29, in Tampa, Florida in Booth [3-2127](#).

#### **About Blue Guard Innovations, LLC**

[Blue Guard Innovations \(BGI\)](#), is a global leading provider of boat monitoring and control solutions that protect boat owners and the environment. The company offers an assortment of boat remote monitoring and control solutions to better predict potential issues and alert users before they become costly. BGI's extensive portfolio of sensors, switches, and alarms work in conjunction with one another to reduce threats of intrusion before the vessel is ever stolen.
