

PRESS RELEASE

Makefast adds three new products to its line-up for 2022.

Makefast have not stood still during the uncertainty of the last two years taking the opportunity to design and develop three new products to complement their range of luxury marine systems.

The Louvred Roof, Privacy Blind and Sliding Console Mechanism each allows the boat owner to set the mood. Creating flexible spaces which can be cosy and intimate or filled with light and air.

First revealed at METSTRADE in November, the three products have been very well received with boat builders and designers worldwide.

Each of the three products can be tailored to suit your application and is manufactured using high quality 'marine grade' 316L stainless steel and self-lubricating composite components to ensure smooth operation in potentially harsh environments.

The Louvred Roof is a unique design that is around 30% lighter than similar systems, featuring tilting louvres that retract along a stainless-steel track that can match the profile of the boat and allows the user a choice of shade and ventilation styles.

The Privacy Blind creates instant privacy and shade as required. It is simple to install and can be easily retrofitted.

The Sliding Console Mechanism, based on Makefasts industry leading sunroof technology, allows previously fixed seats, furniture and consoles to be moved at the touch of a button whilst remaining concealed.

"We've seen excellent growth throughout 2021" said Makefast CEO Richard Jones, adding that "This year (2022) we will develop at least two new products and similar for the following year alongside expansion of our manufacturing and fabrication capacity".

An additional 1300sqm is in construction a few miles from our existing facility which will house Makefast subsidiary CMD allowing for all existing machining facilities to be located in one area.

This in turn releases 400sqm of space for the Marine Assembly processes.

2022 is shaping up to be another excellent year for the company.
