

PRESS RELEASE

We at the Makefast Group are excited to announce the following new products and services:

NEW PRODUCT: Hydraulically powered bathing platform

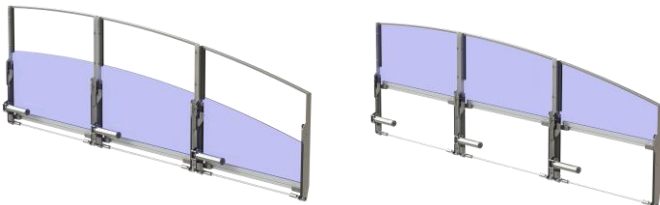

Based around our industry leading Bimini Hydraulic Unit (BHU) system, the Makefast Group is pleased to announce our new revolutionary hydraulically powered bathing platform system. This features a high quality compact hydraulic actuator and pump, housed discretely within the structure of the boat. It is ideal for both aft bathing platforms and for smaller side swim doors.

NEW PRODUCT: Demountable lifeline system

As a compliment to our hydraulically powered bathing platform system, the Makefast Group has developed an easily installed demountable lifeline system that fits to the outer decks or platforms. This utilises Makefast's high-quality marine hardware in a clean, compact design that ensures the boaters keep safe and dry!

NEW PRODUCT: Electrically powered windows

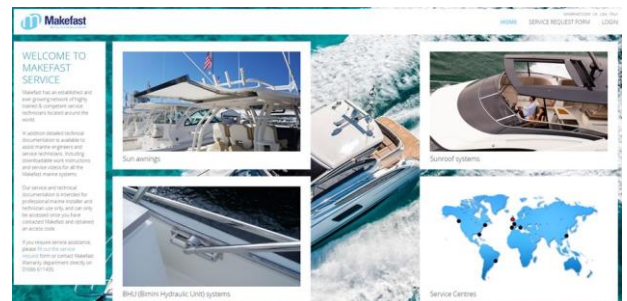

As part of Makefast's continual expansion into new market sectors, our Custom Marine Development (CMD) division has developed a range of electrically powered windows for the custom tender market. These are now available for sports yachts and cabin cruisers. Each system uses Makefast's proven sunroof drive technology combined with high quality fittings.

NEW SERVICE: Makefast Service & Warranty Portal

We are very pleased and excited to announce the launch of our new "Service Portal" to the Makefast.com website. This portal offers full technical online support and technical documents for our customers and end users alike.

This is the first part of a major enhancement to the aftersales service we are offering our customers, being followed by a range of extended 3 year warranties for our sunroof and awning products. Additionally there will be aftercare kits for boat builders, owner and dealers to purchase containing the necessary spare parts.
