New Female Connector from John Guest USA

FAIRFIELD, NJ – John Guest[®] presents the new 3/8" O.D. x 9/16"-24 Female Connector for use in the Marine Plumbing Market including Water Purification, Beverage Dispensing, Appliance, and Domestic Plumbing Markets.

Ideal for connections in Water Filtration, Pump and Valve connections, and Water Dispensing Systems including coffee brewing equipment and vending machines, these connectors also satisfy Hot and Cold water plumbing and Hydronic Heating applications as well. Featuring a chrome plated brass captive nut, this fitting is manufactured from high quality engineered plastic and is trusted by Appliance Manufacturers, Installers, and Service Technicians to provide them with a reliable connection.

Now available for sale, the new female connector has both NSF 14 and 61 Certifications and complies with the latest edition of the Uniform Plumbing Code[®] and the International Plumbing Code[®].

About John Guest USA
