NEW LINE OF PROPELLERS & INTERCHANGEABLE HUBS

Alabaster, AL (July 2023) Engineered Marine Products (EMP) officially announced at the NMDA STEP Conference in Chicago EMP Announces a New Line of Propellers & Interchangeable Hubs: Delivering Quality, Performance, and Value

EMP, a leading provider of high-quality marine products, is thrilled to announce the launch of its new line of Propellers & Interchangeable Hubs. With a focus on quality, performance, and value, EMP propellers cover a broad range of boating applications with their exceptional capabilities.

The initial release will feature aluminum interchangeable hub propellers catering to the most popular applications. The D group series is designed to fit 40-140 HP with 4 1/4" Gearcases, offering pitch options of 13, 15, 17, and 19 inches. Additionally, the E series propellers cater to 115 HP and above with 4 3/4" Gearcases, providing pitch options of 15, 17, 19, and 21 inches.

The new EMP propellers are engineered to deliver outstanding performance and excellent value across a wide range of boating applications. Featuring cupped and cambered blades, these propellers ensure optimal grip for powerful acceleration, higher top speeds, improved bow lift, and overall peak efficiency.

Furthermore, EMP interchangeable hub kits, designed for use with their propellers, are fully compatible with other leading brands, providing users with versatility and convenience.

Looking ahead, EMP has exciting plans for expansion. In the fourth quarter of 2023, the company will introduce the C series propellers and Stainless-Steel variants in the D and E series. These additions will be accompanied by user-friendly point-of-purchase (POP) materials and best-in-class packaging, allowing dealerships to display the products effectively within a minimal footprint.

For easy access to EMP's wide range of products, including the newly launched propellers, customers can download the EMP product catalogs from the official website at www.engineeredmarineproducts.com. The catalogs feature the complete line of Engine Parts, Marine Power Engine Parts, EMP Steering & Controls, and the EMP Propeller Catalog.

For more information on EMP parts, interested parties are encouraged to reach out to their local distributor or contact EMP at 205-216-0560.

About Engineered Marine Products is a leading provider of advanced marine solutions, specializing in the design, development, and manufacturing of high-quality products for the boating industry.
