

DUAL LOCK COOLER SLIDE

Ocoee, FL – September 21, 2020 - Teak Isle is excited to introduce a new design in locking cooler slides.

Teak Isle's latest cooler slide design eliminates the need for unsightly slide bolts and push pins. With a simple pull of the front handle the cooler can slide between the stored and extended positions so that it can double as a sturdy seat. "We are excited for this cooler locking system because it increases the seating capacity of a boat while still being a functioning cooler," said Pat Brown, President of Teak Isle. The dual stainless locking mechanism works in both the stowed and extended positions, engages on both sides and is completely contained under the cooler for a clean, low profile look. This design can be customized to fit a variety of sizes and brands of coolers to fit the boat's available space.

###

Teak Isle Mfg. is the trusted source for CNC cut OEM plastic and wood component parts for over 200 boat builders. With an engineering staff of 18 and over 250 team members running 9 CNC routers, Teak Isle works with builders from design concept to on-time delivery of high-quality custom parts. Products include cabin entry doors, laminated cabinetry, Corian countertops, access doors, bent acrylic sliding doors and King StarBoard HDPE parts.

Boat dealers and retail customers can find a variety of custom and universal cooler slides available at www.BoatOutfitters.com or by calling 866-333-5912.
