

Introducing SEAJET PELLERCLEAN: An Eco-Friendly propeller and running gear coating system with Biocide-Free Silicone and Epoxy Primer

Belle Chasse, Louisiana – 8/8/2023 –

SEAJET PAINT is a yacht paint brand of CMP, technology leading company of Marine coatings. SEAJET PAINT, is excited to introduce the world's best sold silicone running gear coating "SEAJET PELLERCLEAN" is now available in USA. The product has been the bestselling product in 50 different countries for over 20 years. This cutting-edge two-coat system brings together environmental consciousness and high-performance propeller protection, setting new standards in the industry.

As SEAJET we say "*Seeing is Believing*" with the confidence of more than 520.000 satisfied customer.

Next-Level Running Gear Protection with Eco-Friendly Ingenuity

SEAJET PELLERCLEAN features an innovative dual-layer system that combines a two-component epoxy primer, free of zinc chromate, which provides exceptional adhesion on underwater metals even compared with Etching primer. This primer acts as the foundation for outstanding protection and strong adhesion provides longer lifetime of the coating system. It combines seamlessly with an advanced silicone-based foul-release coating, creating an ultra-smooth surface that prevents fouling in both saltwater and freshwater.

Easy Fouling Removal: Transforming Boating Experience

SEAJET PELLERCLEAN introduces a game-changing feature – any fouling that accumulates on the surface is automatically removed when the vessel is in motion. Even during periods of slow speeds or inactivity, a simple quick wash or sponge will effortlessly remove surface fouling, ensuring a smooth and uninterrupted maritime experience.

Key Unique Selling Points:

- 1. Long-Lasting Protection:** SEAJET PELLERCLEAN 's patented silicone resin retains its active service life of up to 24 months. This exceptional durability offers unmatched protection and peace of mind for boat owners.
- 2. Ease of Application:** Applying SEAJET PELLERCLEAN is a breeze, thanks to its epoxy primer. The long overcoating interval between the primer and the silicone finish allows for flexible application, making the process seamless and user-friendly.
- 3. Localized Repair:** In the event of minor damages, SEAJET PELLERCLEAN offers the convenience of local repairs. Simply apply the full system to the affected area after lifting the boat, ensuring efficient and cost-effective maintenance.
- 4. Fuel Efficiency:** SEAJET PELLERCLEAN's fouling-free propellers and stern gear lead to apparent fuel savings throughout the season, adding value to both boaters and the environment.

Availability:

SEAJET PELLERCLEAN is manufactured at our US facility in Belle Chasse, Louisiana, and is conveniently accessible for purchase through our growing network of distributors across the United States.
