## RITEAIRE MARINE REDUCES MOISTURE ELIMINATES MOLD & ODOR

Is your yacht healthy? Moisture-causing hidden mold & VOCs can make you sick. You may not know three facts about your yacht's indoor air quality. First, mold can irritate your eyes, nose, throat, and lungs. Secondly, your yacht air conditioner cannot eliminate mold growth. Thirdly, when your yacht has a whole boat dehumidifier that maintains a 40-50% humidity level, then this eliminates mold, and reduces formaldehyde levels in your yacht.

RiteAire Marine™ is the marine industry leader in providing a whole boat dehumidifier solution that reduces moisture which eliminates mold & odor. The company, founded by engineering and marine service experts, designs and installs innovatively, technologically advanced systems. The patent pending system distributes the dehumidified air via the yacht duct work automatically removing humidity, moisture, VOCs, odor, and mold spores from the yacht air.

Get your free copy of the scientific test data in the Special Report "*Is Your Yacht Healthy?*" that provides positive proof that moisture-causing hidden mold & VOCs can make you sick. Discover the EPA and CDC facts "...to control indoor mold growth is to reduce indoor humidity to 30-60%."

Get the facts and proof that your yacht A/C cannot eliminate mold growth. Learn how the RiteAire Marine dehumidifier system achieves a healthy yacht indoor air quality. Watch the 4 minute *Is Your Yacht Healthy* video to easily understand the test data.

See and read how RiteAire Marine™ whole boat dehumidifier solution achieves 40-50% humidity, no condensation, no mold, and reduces formaldehyde VOC levels.
