

Press Release: for immediate release

Scanstrut Launches Revolutionary 12/24V Waterproof Wireless Phone Charger Range.

FLORIDA (October 1st 2018) Outdoor technologies leader **Scanstrut** is excited to launch its latest innovation – waterproof, outdoor-ready wireless on-board charging. The IPX6 waterproof 12/24V Qi certified waterproof wireless charging range enables charging for the outdoor environment without the need for phone charging cables. “Designed from the ground up, this is the world’s first waterproof wireless charge system created specifically for use on board, with the unique technology is housed in an IPX6, full encapsulated and sealed unit,” said Grant Fox, Scanstrut marketing manager.

Working directly with 12/24V systems, ROKK Wireless is ideal for life on the move and is perfect for boats and RVs.

“It’s easy to install, anywhere you need your phone,” said Fox. “No more wires.”

Exceeding the latest and highest standards of the Qi wireless protocol, ROKK Wireless is independently certified to deliver ultra-safe, wireless charging anywhere on board.

Install options

ROKK Wireless Hidden- This waterproof wireless subsurface charger 12/24V (SC-CW-01E) is hidden from view but always ready to charge. It’s engineered to be installed under the surface and leave the top surface un-cluttered and looking perfect.

“Simply etch in your logo to identify the charge location,” said Fox. “It’s ideal for GRP or wood, and can be installed under tables, cabinets, consoles or work tops. The installation system is simple to install and works with a variety of panel depths and materials.

ROKK Wireless Surface – This low-profile, flush-mounted waterproof wireless charger 12/24V (SC-CW-02E) comes with an ultra grippy, non-slip surface. It sports a contemporary look with two-tone color and is designed to complement modern interiors and exteriors. It’s designed to fit to any smooth surface, indoors or out.

ROKK Wireless Bezel. Easy to install, this waterproof wireless charger 12/24V (SC-CW-03E) includes the non-slip surface pad but simplifies installation even further. Simply drill a 10mm cable access hole and fit to your chosen location, Qi waterproof wireless charging is ready to go.

Rave reviews

The response to the ROKK wireless range has exceeded Scanstrut’s outstanding export records for new products and has been selected by the leading sailboat, power and ski boat builders for their upcoming models.

Scanstrut’s representatives are out demonstrating the ease and speed of installation, safety features and location optimization of the range, allowing boat builders to see firsthand the benefits and key features of this innovative product range. Production samples are available on request from

Scanstrut's facility in Connecticut. 3D CAD and technical drawings are available upon request to aid in the design and development process.

"Qi Wireless Charging is now being integrated in all new phones and is fast becoming the safest and most convenient way to charge your cell phone in the home, car and now, thanks to 12/24V waterproof ROKK wireless charging range, your boat," said Fox.

About Scanstrut

Scanstrut is an international market leader in the design and manufacture of installation solutions for marine electronics. Scanstrut has been creating innovative products that withstand the harshest of elements for over 30 years. Its expertise has been recognized through many global industry awards, including the prestigious overall win at the 2017 DAME awards.

Scanstrut's extensive product range includes the ultra-tough ROKK mounting system that ensures smaller and personal electronics are secure and outdoor-ready. The Scanstrut Deck Seals are among the only guaranteed and proven watertight seals for electronic cabling. "Our Waterproof USB Charge Socket is again the only product on the market to guarantee waterproof while in use onboard USB charging," said Fox.
