Stainless Steel Cabinet "U" Handles, Angled, with Tapped Holes Available from JW Winco

NEW BERLIN, WI – JW Winco, Inc., A Ganter Company, a leading supplier of standard industrial machine components, offers [GN 565.7 Stainless Steel Cabinet "U" Handles, Angled, with Tapped Holes](#).

The angled cabinet "U" Handles, which are RoHS compliant, have a 35° angled contact surface that allows improved access even in tight spaces such as corners. Produced from profiled aluminum extrusions, the U Handles special features are their rigidity and smooth surface.

The desired profile is the result of superior design and being ergonomically shaped. The stainless steel handle (European Standard No. 1.4301, AISI 304) is matte shot-blasted with tapped holes for mounting from the back (threaded blind bore).

JW Winco offers an extensive selection of inch and metric size adjustable levers, cabinet U-handles, plastic and steel hinges and locking mechanisms, revolving and retractable handles, hand wheels, hand cranks, tube connection and conveyor components, inch and metric construction tubing, shock absorption mounts, leveling mounts, hand knobs, spring, ball and indexing plungers, jig, fixture and fastening components, retaining magnet assemblies, toggle clamps, metric casters and wheels, universal joints, oil sight glasses, and metric tools for the industrial and commercial equipment industries. JW Winco's new website, with improved 3D CAD and online buying, is viewable at www.jwwinco.com.

JW Winco, which is ISO 9001:2008 certified, is located in New Berlin, Wisconsin, with sales locations in Canada and Mexico. For more information, contact JW Winco at 800-877-8351, by fax at 800-472-0670, on the Web at www.jwwinco.com, and via e-mail at sales@jwwinco.com.
