**TACO Marine® Products To See
@ IBEX 2022, Booth 3-1431
September 27-29**

MIRAMAR, FLORIDA (USA) – The TACO Marine® booth (3-1431) at IBEX next week will feature a wide range of products including award-winning ShadeFin®, and will introduce boat builders to the new Open Water Internal & Collapsible Carbon Fiber Outrigger Poles [OI Series].

New Open Water Internal & Collapsible Carbon Fiber Outrigger Poles

Unlike other internal, triple-rigged poles on the market that are fixed or challenging to setup and take down, the OI Series can be collapsed quickly and with ease for transportation and storage.

TACO's 3-piece design features a patented latching mechanism that provides a Twist & Lock connection between each pole segment. Another innovative feature of these internally rigged poles is the ability to perfectly index the halyard line using the adjustable ratchet base/butt with a threaded locking collar. This design element eliminates chafing and ensures the smooth ascent and descent of outrigger lines. Additionally, each halyard line has its own internal tube running the length of the pole to its exit point that ensures smooth line operation with no tangling.

Compatible with all standard 1-1/2-inch outrigger mounts, these poles come internally rigged with premium 400-pound mono halyard line in three distinct colors for easy identification of use.

ShadeFin® By TACO Marine

Winner of a *Boating Industry* Top Product Award, ShadeFin easily attaches into rod holders, tops and gunnels for convenient, portable shade for almost any boat. ShadeFin's fabric provides a UPF 50+ rating of sun protection for multiple areas of the boat, including fore, aft and sides of tops and anywhere there is a rod holder. It pairs with either a fixed or adjustable rod holder mount, which insert into any standard rod holder, a hardtop bracket mount, the TACO Marine Grand Slam 170 Outrigger or 170-2 Center Rigger Mounts, or with a fixed or adjustable clamp-on mount for pipe or tube.

New Stainless Steel Sundeck Latch

This low profile, concealed latch is made entirely from Type-316L stainless steel and is perfect for an array of applications, including engine hatches, access panels, cabinet doors, dock boxes and folding seats. Its non-slip grip ensures a secure lift and comes with an adjustable anchoring stud.

Hideaway Ratchet Hinge

This hinge effortlessly transforms a standard seat cushion into a Class-A backrest to allow for versatile seating and deck options. The distinctive below-deck design provides functional, adjustable hinge operation without visible hardware.

TACO Seating

From premium made-in-the-USA helm chairs and benches to smooth, low-profile manual and electric seat slides, TACO's booth will also showcase its product offering from TACO Seating – the company's upholstery division located in Largo, Florida. TACO Seating is devoted entirely to complete marine seating, upholstery, and hardware solutions for boat builders. TACO's dedicated team of Engineers, Designers and Craftsmen specialize in creating high-quality upholstery and hardware packages for builders who seek visually stunning and contemporary onboard seating.

TACO is also slated to showcase additions to its Outrigger Mount offering, as well as highlight its Blackout Series – a black hard coat anodized aluminum finish that provides enhanced protection from the elements and unbeatable style.

The company's Innovation Award-winning Carbon Fiber Tele-Outriggers, available in 16-, 20- and 24-foot lengths, and Deluxe Aluminum Tele-Outriggers will also be on display. These poles feature TACO's unique and patented 360° swivel collars for a more natural bait presentation.
