**TACO Marine® Products To See  
@ IBEX 2020 Online Experience  
September 29 – October 2**

MIAMI, FLORIDA (USA) – The TACO Marine® virtual booth during this week’s IBEX 2020 Online Experience will feature a wide range of products, including Grand Slam electric mounts and SuproFlex rub rail, and will introduce boat builders and repairers to the new TACO Marine electric seat slides.

**GS 850 & 950**

The Grand Slam 850 Electric VHF Antenna Mount easily installs to the surface of a hardtop and will fit all top thicknesses. No under-mount clearance is required. A standard 1-1/4” thread (male) shaft will accept all standard VHF antennas.

The GS-950 Electric Masthead Anchor Light is ideal for powered vessels 39’ (12 meters) and under and is certified for the USCG-required 2 nautical miles. This mount also easily installs to the surface of a hardtop and fits all top thicknesses. The light runs on 12 volts and consists of four 3-watt LED Cree chips driven by two Mean Well drivers.

Click here (<https://youtu.be/9PLeUfkubdM>) to watch a video with Mark Henderson as he explains how the GS-950 works.

## SuproFlex Rub Rail

SuproFlex Rub Rail has higher impact resistance, requires minimal heating, is super flexible, easier to install, requires less manpower and reduces materials cost. Designed for boats up to 65', SuproFlex is co-extruded vinyl that provides two levels of hardness to ensure enhanced protection from impact. It requires no pre-forming and easily molds to most hull shapes. This rub rail is available in a variety of sizes and colors, and pairs with TACO's patented Flex Chrome Insert, which can also be customized to any color preference.

## New Electric Seat Slides

New TACO Marine® Electric Seat Slides are available for chairs and benches from 23" to 54". All the slides are frictionless, strong and low profile and meet ABYC standards for impact and load.
