## Blind Fastener System by- VersaChock

### *Deck Hardware Installers Dream!*

The [VersaChock blind fastener plate](#) is designed exclusively for use with VersaChock brand threaded deck plates (VCDECKPLATE), which can be used with standard eyebolts and bolts for attaching and securing deck hardware. The system allows for deck plate installation when access to the backside of mounting surface is not possible. It also serves as a backing plate. Perfect for solo installations when a second set of hands is not available! Made of high quality 316 stainless steel. Three #10 x 2" length oval head screws, installation stud and tie strap included. Patent/s pending. [Click here to watch video.](#)

- For use with our exclusive threaded deck plates (used for installing our tilting davits, roller kit, roller winch kit, and tie down eyebolts)
- Perfect when there's no access to backside of mounting surface
- Perfect for solo installs, even when access to backside of decking is possible
- Also works as backing plate
- Installation hardware included
- Patent/s pending
