VersaChock® at IBEX Booth 1-033, first floor, Tampa October 1-3, 2019

We specialize in the most innovative products designed for keeping coolers, cargo, removable fuel tanks, tenders, jet skis, SUP's/kayaks, and cargo in place on boat decks and docks. Our products all incorporate our patented "removable" chocks, that allow for a "trip-free" deck when not in use! New for the 2019 IBEX show: we added a cream color to the cooler chock product line; a redesigned tender chock latch, thicker/more robust multi-color SUP/kayak racks, a brand-new drink table that even includes a very cool removable umbrella for shading drinks/passengers. Finally, we are proud to offer custom design and fabrication service for unique and challenging configurations.

Jefferson Design Inc (Manufacturer of VersaChock products) has over 32 years experience in marine, automotive, consumer product design; including development, patents/trademarking, and manufacturing.
