ADDMAN Engineering Makes It Simple with upgraded Website to Help Visitors Navigate the Complex Additive World

Bonita Springs, Florida – September 7th, 2021: ADDMAN Engineering, the only Engineering Centric Additive service bureau, has refined its web presence with a comprehensive new website (www.addmangroup.com) to better serve clients and visitors in search of vital information about industry solutions and services.

ADDMAN's new website makes it easy to learn more about the organization. The company has pages detailing their solutions, processes, materials, and the industries they serve. Current clients or prospective customers can explore the pages to learn more about every area of the business.

Visitors can stay up to date with ADDMAN by visiting the blog and press release pages. Both pages are updated regularly with news and information about the company, including upcoming events. If you are looking for a career in the additive manufacturing industry you can visit the careers page for current openings (www.addmangroup.com/careers).

Future updates to the website will include online quote submissions, in-depth information about the additive industry, and much more. The team at ADDMAN is also excited to announce their latest push into tradeshow with their first phase of booth expansion and designs. The

company is ready to meet clients and prospects in person to discuss ways they can help businesses reach their goals by solving complex problems with modern additive technology.

ADDMAN will be attending the following tradeshow:

Rapid + TCT 2021

3D Printing & Additive Manufacturing Show

September 13 – 15, 2021

Booth # E90925

IBEX Tampa 2021

Boat Manufacturing Show

September 28 – 30, 2021

Booth # 1-1016

Attendees of both tradeshow will be able to speak directly with ADDMAN staff and learn more about their services. The company will have information and samples of their work onsite for visitors to view. A booth visit will also show off ADDMAN's laser scanning technology and the chance to view printed structures through a microscope.

About ADDMAN Engineering

ADDMAN Engineering is the only engineering centric additive service bureau in North America. The company offers entire product life cycle support including prototype design, simplification of complex parts, custom tooling, and after-market digital inventory solutions. ADDMAN utilizes metals and polymers to create parts of every kind. Processes include laser scanning, composite printing, metal printing, and CNC 5-Axis. ADDMAN serves the space, medical, aerospace, military, automotive, orthotics, automation, and consumer industries. For more information visit: www.addmangroup.com
