PREMIUM DOCK BOX KEEPS EXPENSIVE RODS SAFE

Fishing tackle is an investment that needs to be protected from damage and safeguarded from theft. With over 20 cu. ft. of storage, Better Way Products' 825 Rod Box is a premium quality dock box that securely holds three 7' rods in its lid for easy access.

Made in the USA using marine-grade fiberglass, the 825 Rod Box has a long-lasting UV-resistant gelcoat finish inside and out that rivals any yacht. With an average thickness of 3/16", its protruded walls add a high degree of rigidity. At 110 lbs., this is a serious piece of equipment.

Strong enough to sit on, the lid uses a sandwich core construction for unsurpassed strength. Mounted inside are the rod holders with ample clearance needed to accommodate reels.

Hardware on the 825 Rod Box is premium quality. Its full length piano hinge, lockable hasp and cable stays are stainless steel, and secured with oversized, rustproof rivets. Gas lifts are standard, and make opening and closing the lid a breeze.

The Better Way Products 825 Rod Box is offered in white, gray and tan, with custom colors available. It measures 96" L x 22" W x 24.25" H and costs \$1,028.
