## DOCK BOX OFFERS IMPRESSIVE ACCESS AND EASY LOADING

Few dock boxes are as innovative as the Better Way Products TR2—or as practical. Aside from the top lid opening, the front panel swings open for impressive access and easy loading of awkward or heavy items.

The TR2 is manufactured in the USA of marine-grade 3/16" fiberglass with a glossy, UV-resistant gelcoat finish. Built like a boat, it has a core construction and protruded walls for added strength. Better Way Products uses only rust- and corrosion-resistant hardware including the full-length piano and door hinges, lockable hasp and cable stays.

Inside, the Better Way Products TR2 measures 23" W x 23" D x 34" H, making it ideal for storing everything from a 40-gallon trash container to scuba tanks. Outside, the 27" W x 27" D x 36" H dimensions take up little dock space. Weighing 50 lbs., it's heavy enough to not need permanent installation in most sheltered locations. Available in white, gray and tan, it costs \$695.

Better Way Products designs, engineers, prototypes and produces a wide range of molded components using the latest technology and tooling. It is one of the oldest and largest fiberglass manufacturers in the US.
