## JMP DEBUTS REPLACEMENT ENGINE COOLING PUMP AT IBEX

JMP Corporation's new crank-mounted JPR-CP25UH engine cooling pump replaces a wide range of OEM and aftermarket models, including the widely-used Sherwood P105. Fitting engine brands such as Crusader, Ford, GM, Indmar, Marine Power, PCM and Volvo Penta, it offers outstanding engineering and build-quality at an affordable price.

JMP manufactures the JPR-CP25UH in its ISO-certified facility to exacting standards. This attention to detail allows the pump to be 100% drop-in compatible. It's made from cast bronze with stainless steel wear plates, heat-resistant fiber gaskets, corrosion-resistant fittings and marine-grade, non-magnetic shafts.

Like all JMP replacement pumps, the JPR-CP25UH is designed to deliver massive flow. This is due to its optimized internal configuration and the company's legendary flexible impellers. Made of a unique, wax-infused proprietary blend, they resist salt, oil, chemicals and extreme heat. They're so durable, when tested by the US Navy, they outlasted all other brands by a margin of two to one.

JMP Corporation's JPR-CP25UH replaces a broad range of Jabsco, Johnson and Sherwood pumps. It comes with a one-year warranty and has an MSRP of \$199.
