## GAS ADDITIVE NOW FOR BIGGER BOATS

Stale gasoline makes for hard starting and poor combustibility. But it's not practical—nor recommended—to run a marine engine dry to avoid having fuel sit in a tank unused. The solution is to use LIQUI MOLY Marine Gasoline Stabilizer. Now available in a larger size for bigger boats, it keeps fuel fresh for months and provides long-term protection against fuel aging and oxidation-related problems.

Marine Gasoline Stabilizer is ideal for all two- and four-stroke marine engines, and safe for catalytic converters. The advanced formula's unique organic content stabilizes gasoline, perfect for long-term storage situations.

An easy-to-use pour-in liquid, Marine Gasoline Stabilizer is added at a ratio of 1:200. Once poured into the tank, the engine is idled for 10 minutes. A 33.8 fl. oz. can of LIQUI MOLY Marine Gasoline Stabilizer protects up to 53 gal. of gasoline and costs \$34.49. A 6.7 fl. oz. size that treats up to 18 gal. of fuel runs \$14.99.
