STORAGE SEASON IS COMING. TIME FOR MARINE GASOLINE STABILIZER

One of the most important items to take care of when winterizing a vessel is its fuel system. With Marine Gasoline Stabilizer from LIQUI MOLY, it's simple to provide long-term protection to 2- and 4-stroke engines and ensure an easy start next spring.

Marine Gasoline Stabilizer safeguards against gasoline aging and oxidation, stabilizing and preserving the fuel for months. The unique formula protects the entire fuel system from corrosion and is safe to use with catalytic converters. And when the cover comes off in spring, it improves starting performance.

Ideal for DIYers and marine techs alike, Marine Gasoline Stabilizer is cost-effective due to the exact dosing that can be accomplished using the integrated measuring chamber and mixing ratio of 1:200. One can treats 52.8 gal. of gasoline. After adding the correct amount to the fuel, the engine should idle for approximately 10 minutes. A 33.8 fl. oz. can of LIQUI MOLY Marine Gasoline Stabilizer has an MSRP of \$35.99.

LIQUI MOLY formulates an oil for nearly every marine diesel and gasoline engine built over the past few decades. Its Oil Guide helps users choose the proper lubricant, online at www.bit.ly/LiquiMolyOilGuide and integrated into the company's Android and iOS mobile apps.
