## COMPACT, YET HIGHLY CAPABLE ROUND STEREO RECEIVER

To optimize onboard space, many boats have smaller consoles and dashboards. For them, the Infinity by Harman INFPRV90 stereo receiver from ProSpec Electronics makes sense. Fitting into a standard 3-1/4" round cutout, it offers the latest playback options in a compact housing, and at a very attractive price point.

Engineered from the ground up for a marine environment, the INFPRV90 is IPX6-rated to withstand constant rain, spray and salt. Large tactile buttons and a bright LED display make it easy to use while underway. The stereo receiver features AM/FM reception, an Aux input and USB input with charging capabilities. Built-in Bluetooth® allows for easy streaming from a smartphone.

Rated at 4x40W peak @ 4 ohms, the 4" dia. INFPRV90 delivers the pure, clean audio quality Infinity by Harman is known for. The built-in amplifier has a pigtail lead for easy wiring. Ideal for refit and OEM alike, it's available from ProSpec Electronics; it retails for \$179.95.
